

What students say

"Finally understood a question I've been stressing about for hours!"

- Year 11 student, maths

"YourTutor is helping me feel better and more confident with my work because I'm starting to understand maths problems. THANKYOU! You have no idea how much better I feel about myself"

- Year 10 student, maths

"Before I was scared to write an essay, but now I'm so much more confident than I was before."

- Year 8 student, Essay writing

"It think that it's really helpful! Always having someone there to help you if your parents don't understand your homework or it's too late to ask a teacher is really great to have."

- Year 11 student, biology

What parents say

"My son has been using YourTutor service on [our library] website. We are very happy with this service, it has been a big help to my son. Tutors are very helpful, giving guidance to students, ensuring they understand the question completely. My son was losing his smile for Maths, but it returned when using this service. Thank You!!"

So how do I use YourTutor now?

As a library member, you get access to the service for free.

Step 1: Go to yourtutor.com.au/connect

Step 2: Click the 'Find Your Library' button on the right

Step 3: Use your library member card number to log in (it's on the back and might look like a barcode)

Once you have logged in, you will see all the subjects, year levels and opening hours available for you, thanks to your library.

Your awesome Library is part of something big in Australian education.

Hundreds of libraries, schools, unis and TAFEs all over the country partner with YourTutor to provide thousands of students with on-demand help after hours *every night*, to ethically assist with their homework and study, quickly, right in their moment of need.

Expert online
homework and
study help
when you need it most

How does YourTutor work?

We all get 'stuck' sometimes.

On homework. On an essay. Or revising for an exam.

Imagine an expert was just a click away, 24 hours a day, 7 days a week?

Without even leaving home.

That's YourTutor! Real, expert help that's always just a click away. Use the typed chat feature, draw on the interactive online whiteboard, or upload a document for writing feedback.

And it's **FREE** thanks to your library.

What will happen in an online YourTutor session?

Every student is unique, with different questions, study struggles, and ways of learning.

So every YourTutor online session will be different, too. It all comes down to the question you ask. You also get a chance to say exactly what you're stuck on, and 'how' stuck (from completely baffled, to *almost there!*)

Who are the online tutors?

The best minds; made up of teachers, university academics, and other professional experts.

Every single tutor must pass stringent tests, screening, background checks, and training, to compete for a place in the YourTutor network. All are recruited on Australian education standards. All go through continuous checks with our Academic Services and Quality Assurance teams.

What are the educational standards?

With tightly held academic standards and ethical policies, parents and teachers are assured that the help students receive is contributing to their capability to think for themselves- we employ constructivist learning techniques, and a strict 'no answers' policy. Read the full education policy here: yourtutor.edu.au/edupolicy

Typed chat. Students write back and forth with the tutor in an environment they're comfortable with.

Interactive whiteboard. Draw in real-time with the tutor, so it's easy to discuss graphs and equations.

File upload. Send a draft writing file (essays, speeches, creative writing, reports) to a tutor for detailed, expert feedback on how to make it even better.

What subjects can we get help with?

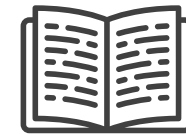

All core curricula subjects. Students studying history or other humanities subjects can get help by selecting 'Research' or 'Writing feedback' depending on their question, even though, for example, 'History' is not visible. English, maths, and the sciences (biology, chemistry and physics) are specifically covered.

Maths

General maths
Specialist/extension maths

Also available
Business Studies
Accounting
Economics

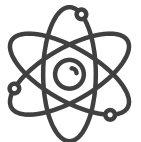

English

Essay writing
Report writing
English skills & concepts

Creative writing
Speeches
Referencing

Also available
Assignment research
